23FEB2016

Dear Dr. Johnson/Tammy,
Re: Gregory J. Chrisman
[REDACTED]

Capt. Chrisman's SI expires 28FEB016. He has a good program of recovery in place. Letters from
Aftercare Airline HIMS chair and chief pilot all verify this. He had F/U with DR. Rozansky
11JULY2015 and he noted that he could be released from monitoring.
He had a brief relapse to alcohol 17JUN2010. Following intensive IOP his program of recovery was
much improved and he became comfortable with his sobriety.
I saw him for FAA 1st class medical 9DEC2015 and agree that he can be released from monitoring
requirements.

Sincerely

W. Brathay
